EDUCATION

B. Tech. Computer Science and Engineering
KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY
Cum. GPA: 8.83/10

Sep 2020 – Apr 2024
Bhubaneswar, India

WORK EXPERIENCE

TIGER ANALYTICS | SENIOR SOFTWARE ENGINEER

Chennai, India | Nov 2024 – Present

- Engineered **Infrastructure-as-Code** ingestion for **1,500+ tables** (SQL, Oracle, SAP) via AutoGen and Databricks Asset Bundles, **eliminating configuration drift**.
- Built declarative Delta Live Tables under Unity Catalog governance, automating **SCD Type-2** temporal tracking for strict **credit analytics**.
- Modernized legacy MS Fabric pipelines into **metadata-driven** execution layer, **abstracting hardcoded schemas** to cut production failures by **30%**.
- Deployed isolated **Gateway VM** with Azure Key Vault and **AES-SIV encryption**, **decoupling PII tokenization** from core compute for regulatory compliance.
- Authored **dual-agent** framework wiring YData profiles to LLM via Great Expectations to **enforce data quality rules**.
- Shipped **API-first** platform provisioning using FastAPI & native cloud SDKs, **accelerating data onboarding** by **90%**.

PEGMAN | BACKEND ENGINEERING - INTERN

Remote | Jan 2024 – Apr 2024

- Built checkout APIs with Redis **asynchronous queues**, decoupling customer flow from partner fulfillment.
- Optimized RDS **composite indexes** and execution plans to constrain vendor search latency strictly under **100 ms**.
- Provisioned LocalStack to emulate AWS services (DynamoDB, S3) locally, reducing integration test time by **50%**.

HIGHRADIUS | PRODUCT ENGINEERING - INTERN

Remote | May 2023 – Jul 2023

- Developed full-stack B2B invoice application using React and Java Servlets to **manage accounts receivable**.
- Trained regression model on invoices using **feature engineering** to **forecast payment outcomes** for AR tracking.
- Integrated Dialogflow NLP chatbot, applying **Intent Classification** to **automate manual invoice queries**.

PROJECTS

SYNC SPEAK

REACT.JS, WEBRTC, MONGODB

- Wired **WebRTC mesh** over Socket.IO signaling to relay SDP/ICE for P2P audio rooms at **sub-75 ms** peer latency.
- Implemented Twilio OTP auth with **rotating JWT refresh tokens** in HttpOnly cookies to harden session integrity.
- Modeled global session state in Redux with react-router **protected routes**, gating rooms to authenticated peers.

HEALTH VAULT

REACT.JS, SOLIDITY, ETHEREUM

- Built **decentralized EHR** on Ethereum, anchoring prescription files to IPFS to bypass provider data silos.
- Deployed Solidity contracts via Truffle, locking record history into **immutable writes** to preserve clinical audit trails.

ACHIEVEMENTS

- Google Hash Code**: Secured **Global Rank 1735** (Country Rank 488) with 2,092,461 points.
- Codechef**: Achieved **5-star rating** (2000) and **Global Rank 125** in June Cook-Off 2021 (Div 2).
- Cleared **Problem Solving (Intermediate)** and **Node Js (Advanced)** assessment by **HackerRank**.
- Earned **BFS Credit Risk DB-202** and **BFS Foundation DB-100** assessment by **Tiger Analytics**.
- Certified in **Advanced System Security** and **Cloud Computing Security** by **University of Colorado**.

SKILLS

Languages: Python, SQL, PySpark, Java, TypeScript
Frameworks: FastAPI, React, Node.js, LangChain, MLflow

Data: MS Fabric, Databricks, Spark, Airflow, dbt, PostgreSQL, Pinecone
Cloud: Azure (ADF, ADLS), Terraform, Docker, Redis, CI/CD
