EDUCATION

B. Tech. Computer Science and Engineering
KALINGA INSTITUTE OF INDUSTRIAL TECHNOLOGY
Cum. GPA: 8.83/10

Sept 2020 - Apr 2024
Bhubaneswar, Odisha

WORK EXPERIENCE

TIGER ANALYTICS | SENIOR SOFTWARE ENGINEER

Chennai, India | Nov 2024 - Present

- Extended **Azure Databricks ingestion framework** to ingest **1,500+ tables** from SQL Server, Oracle, and SAP into analytics-ready datasets.
- Implemented **CDC** using manual **watermark analysis** and framework updates to enable scalable incremental processing.
- Orchestrated end-to-end ingestion pipelines using **Databricks Workflows** and **Azure DevOps CI/CD** for scheduled production runs.
- Refactored legacy pipelines into a **metadata-driven MS Fabric setup**, reducing recurring production fixes by **30%**.
- Automated **Fabric connection & shortcut provisioning** with **Platform APIs**, cutting source onboarding time by **90%**.

PEGMAN | BACKEND ENGINEERING - INTERN

Remote | Jan 2024 - Apr 2024

- Engineered **scalable backend** delivery engine with a **microservices approach** for efficient order processing.
- Developed **8+ endpoints** across **2 microservices** integrating with **OMS** and **Aadhaar API** for e-KYC Verification.
- Contributed in design iterations and product strategy, driving **data-driven decisions** and **higher client satisfaction**.

HIGHRADIUS | PRODUCT ENGINEERING - INTERN

Remote | May 2023 - Jul 2023

- Built an **AI-Enabled** FinTech B2B Invoice Management application using React, Java, and MySQL.
- Deployed a payment prediction model with **80% accuracy** via **EDA** and **Feature engineering** using Python.

PROJECTS

SYNC SPEAK

REACT.JS, WEBRTC, MONGODB

- Developed social audio app leveraging **WebRTC & SocketIO** for **real-time** chat with an average **latency of 45-75ms**.
- Architected **microservices** and implemented the **MVC** pattern for improved scalability and maintainability.
- Orchestrated **protected routes** using 'react-router-dom' and efficient **global-state storage** using Redux.
- Integrated **Twilio API** for **OTP-based authentication** over sms /email to enhance security and user verification.

HEALTH VAULT

REACT.JS, SOLIDITY, ETHEREUM

- Proficiently engaged in Decentralized Healthcare, developing a Electronic Health Records Management platform on Ethereum Blockchain, solving **interoperability** and **privacy** among stakeholders.
- Built **easy interface** using **React** and ensured the integrity and availability of decentralized records via **IPFS**.
- Utilized Solidity and **Truffle** for smart contract development and deploying locally with **Ganache** and Metamask.
- Strengthened platform integrating **Aadhaar API** for **e-KYC authentication**, **countering DDoS** and **Sybil** attacks.

ACHIEVEMENTS

- Google Hash Code:** Points scored: 20,92,461 , **Global Rank 1735** (Country Rank 488)
- Codechef:** Max Rating: **5 star (2000)** , Best Performance: **Global Rank: 125** in June Cook-Off 2021 Division 2
- Cleared **Problem Solving (Intermediate)** and **Node Js (Advanced)** assessment by **HackerRank**.
- Qualified for **Level 2 in Flipkart GRiD 5.0 - Health+ Track**, the **only team** from the college to do so.

SKILLS

Languages: Java, Python, SQL, TypeScript (Basics)

Databases: PostgreSQL, MySQL, Oracle, MongoDB, Redis

Technologies: PySpark, Azure (Databricks, ADF, DevOps), MS Fabric, React/Redux, WebRTC, Postman

Development: REST API, Microservices, Docker, Queues, Git
